Find the Standard Deviation of a Numpy Array

Difficulty: **Easy** Accuracy: **87.01%** Submissions: **570+** Points: **2** Average Time: **15m**

Problem Description:

Given a Numpy array, write a function to compute the standard deviation of the elements in t array.

Numpy Schema:

You are given a 1-dimensional Numpy array.

Example:

Input:

```
array = np.array([1, 2, 3, 4, 5])
```

Output:

```
1.4142135623730951
```

Explanation: The standard deviation of the elements in the array [1, 2, 3, 4, 5] is approximately 1.414.

Python3 Start Timer

```
def std_deviation_of_elements(arr):
    # Code here
    return np.std(array)

```
