Find the Maximum Element in a Numpy Array

Difficulty: **Easy**Accuracy: **78.4%**Submissions: **778+**Points: **2**Average Time: **15m**

Problem Description:

Given a Numpy array, write a function to find the maximum element in the array.

Numpy Schema:

You are given a 1-dimensional Numpy array.

Example:

Input:

```
array = np.array([1, 3, 7, 9, 5])
```

Output:

```
9
```

Explanation: The maximum element in the array **[1, 3, 7, 9, 5]** is **9**.
