Find the Sum of All Elements in a Numpy Array

Difficulty: **Easy**Accuracy: **57.28%**Submissions: **1K+**Points: **2**Average Time: **15m**

Problem Description:

Given a Numpy array, write a function to compute the sum of all its elements.

Numpy Schema:

You are given a 1-dimensional Numpy array.

Example :

Input:

```
array = np.array([1, 2, 3, 4, 5])
```

Output:

```
15
```

Explanation: The sum of the elements in the array **[1, 2, 3, 4, 5]** is **15**.
