Find Diagonal Elements in a 2D Numpy Array

Difficulty: **Easy**Accuracy: **78.47%**Submissions: **669+**Points: **2**Average Time: **15m**

Problem Description:

Given a 2D Numpy array, write a function to extract the diagonal elements.

Numpy Schema:

You are given a square 2-dimensional Numpy array.

Example:

Input:

```
array = np.array([[1, 2, 3], [4, 5, 6], [7, 8, 9]])
```

Output:

```
array([1, 5, 9])
```

Explanation: The diagonal elements of the matrix `[[1, 2, 3], [4, 5, 6], [7, 8, 9]]` are `[1, 5, 9]`.
